

# ENERGY AND COST REDUCTION OPPORTUNITIES ARE THERE.

# FIND THEM.

With the Fluke 1730 Energy Logger quantifying energy usage across your facility, identifying energy inefficiencies, and evaluating cost savings potential just got easier.

- Optimized layout with specialized touch screen makes navigation easy—even with gloves on
- Advanced auto-correct feature eliminates costly errors due to improper connections
- Power directly from the measured voltage line (up to 500 volts) or with conventional ac power cord
- Immediate on-screen access to logged data while recording
- Download, analyze and compile reports in minutes with Energy Analyze Software
