FLUKE ®

Biomedical

OneQA software makes your life easier

Fluke Biomedical OneQA is a software platform that empowers you to achieve medical device compliance faster by reducing test time, operating costs and asset downtime.

Regulatory compliance

OneQA software allows you to create and lock custom procedures to help drive standardization and ensure medical device safety. Convert your checklists, spreadsheets and service manuals into OneQA procedures in minutes.

Work order management

Seamlessly route data across systems and teams. Use OneQA alone or integrate it with your CMMS. Report outcomes directly to work orders and instantly generate documentation.

Test automation

Use OneQA to run automated tests on select Fluke Biomedical tools to reduce testing error and increase medical device safety.

Training made simple

Use OneQA software to provide your teammates with step-by-step guidance through text notes and visual aids they can access in real-time while performing tests.

"Love the standardization. It works seamlessly with our CMMS system."

– Mount Nittany Medical Center

"OneQA saves me time, increases accuracy & reportability!"

– Leigh Valley Health Network

"This saves us time, makes our reports look more professional, and doesn't need a CMMS!"

– Centurion Service Group
